

Turn Your Green Thumb into a Thriving Career

Program Overview

South's Landscape Horticulture program offers students an opportunity to increase their plant knowledge, learn landscape design and maintenance techniques, and gain valuable retail experience. Learn immediate job skills through classes that combine lecture, hands-on skills, guest speakers and field trips.

Student projects in the South Seattle College Arboretum, and on campus, have included garden design, installation and renovation, irrigation installation, maintenance and repair as well as annual pruning. The Garden Center also markets and sells plants grown by students.
