MATH 085 Algebra II
April 2008

STUDENT LEARNING OUTCOMES CONTINUED:

2. Computation – Use arithmetic and other basic mathematical operations as required by program of study. Apply quantitative skills for personal, academic, and career purposes. Identify, interpret and utilize higher level mathematical and cognitive skills (for those students who choose to move beyond the minimum requirements).
3. Critical thinking and problem-solving – Think critically in evaluating information, solving problems, and making decisions.
4. Personal responsibility – Be motivated and able to continue learning and adapt to change. Value one's own skills, abilities, ideas and art. Take pride in one's work. Be aware of civic and environmental issues.
5. Technology – Select and use appropriate technological tools for personal, academic and career tasks.

GENERAL COURSE OBJECTIVES:

The student will do most or all of the following:

1. Demonstrate success on evaluations over the topics studied.
2. Work to build a foundation of algebra skills for subsequent mathematical classes.
3. Develop skills in algebra through symbolic manipulation and applications.
4. Develop regular attendance and time management/organization skills.

TOPICAL OUTLINE: Topics likely to be completed include the following:

- I. Polynomials and factoring
- II. Rational expressions and equations
- III. Systems of equations and problem solving
- IV. Radical expressions, equations and problem solving
- V. Solving quadratic equations

The sequence of the topics for Math 084/085 may vary as determined by the math department but all the topics listed in the District College Catalog will be covered in the full two quarter sequence.
